Creation Of New Brands

- **Project Scope**: Managed the creation and development of two new brand websites from a design concept to launch.
- **Key Achievements**: Successfully delivered fully functional, user-friendly websites for both brands, enhancing their online presence and user engagement.

Mobile Applications

- **Project Scope**: Oversaw the development of mobile applications for each brand to ensure comprehensive digital accessibility.
- **Key Achievements**: Developed and launched progressive web apps for the company brands, providing users with a seamless and engaging mobile experience.

Fullstack Engineer | Feb 2018 - Mar 2019
at **Ogilvy, Barcelona**

- **Technologies stack**: PHP, CodeIgniter, HTML, Javascript, jQuery, CSS, Tortoise SVN

Responsibilities

- **Development Improvements**: Developed new features and requests for the websites of the clients.
- **Content Management**: Maintained and updated content on the main websites of a variety of clients.
- **Development Of Marketing Campaigns**: Developed landing pages capable of collecting user data to store it in the database.

Key Achievements:

- Successfully **managed multiple landing pages** for high-profile marketing campaigns, increasing user engagement and data collection efficiency.
- Implemented robust **data handling processes**, enhancing the security and integrity of user data.
- Streamlined content **updates on the main website**, improving the overall user experience and website performance.

Frontend Developer & Webmaster | Sep 2016 - Feb 2018
at **eDreams ODIGEO, Barcelona**

- **Technologies stack**: Javascript, jQuery, HTML, CSS, PHP, Typo3

Responsibilities

- **Marketing Campaigns Development**: Developed different types of landing pages used for the different monthly campaigns, where each had a unique approach and required the development of new widgets and components.
- **Landing Page Management**: Managed and developed landing pages for airline companies and tourism offices globally.
- **Content Management**: Maintained and updated the content for the main website and four different brand websites, each targeting different markets or countries.
- **Multi-Brand Coordination**: Coordinated the management of content across multiple brands, ensuring consistency and localization for each market.

Key Achievements:

- **Developed** and maintained **landing pages** for multiple international clients.
- Ensured **content management across four brands**, improving user experience and brand consistency in diverse markets.

Dynamic Landing Page Solution for CRM Team
- **Project Scope**: Develop a dynamic solution to cater to small markets, enabling the CRM team to easily generate personalized landing pages.
- **Key Achievements**: Successfully created and delivered a website that dynamically generates content based on information extracted from the URL (configured by the CRM team).
